Pentamed® kpSealable™

Medical device films for use with uncoated lid stock material.

kpSealable™ films are designed to be used with uncoated, nonwoven HDPE lidding material, which eliminates the need for costly lacquer coated lidding stock. kpSealable™ is compliant with applicable FDA and EU direct food contact regulations and relevant regulations of ISO 11607-1 and ISO 10993-5.

Benefits

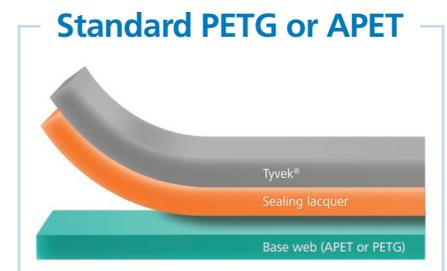

-  Uncoated lidding improves permeability
-  Process on existing equipment
-  Helps reduce the risk of particle contamination
-  Cost-effective solution
-  Similar protection and performance to standard medical grade PETG or APET

Applications

Trays and Blister

- Wound care kits
- Syringes
- Surgical kits
- Catheters

Recommended to be used with DuPont™ Tyvek® medical grades.
