kpNext™ RB5

The Sustainable Future of Pharmaceutical Packaging

Pentapharm® kpNext™ RB5 is designed to be recyclable and will work on your existing production lines. No need for expensive retooling or costly line speed reductions. These vinyl-free and halogen free barrier films have the same thermoforming functionality as their traditional packaging material alternatives. kpNext™ RB5 is suitable for liquid products or products requiring high chemical resistance.

Benefits

Designed to be recycled in the RIC 5 stream

Reduced CO₂ footprint

Halogen-free

Excellent thermoforming capabilities

Superior barrier characteristics & chemical resistance

Applications

- **Over-the-counter (OTC)**
- **Ethicals**
- **Generics**
- **Nutraceuticals**
- **Veterinary medicine**
