kpNext™ R1

Tomorrow is finally here and it is crystal clear!

Finally, there is an alternative to vinyl blister films that will meet or exceed all your sustainability goals and work within your current manufacturing setup. kpNext™ films are designed to be recyclable and will work with your existing production lines. No need for expensive retooling or costly line speed reductions. With kpNext™ you get the best of both worlds, sustainability, and performance, plus so much more!

Benefits

Designed to be recycled in the RIC 1 stream

Vinyl-free

Plug & play with current equipment and designs

Superior optical clarity

Sustainable competitive advantage

Applications

- Over-the-counter (OTC)
- Ethicals
- Generics
- Nutraceuticals
- Veterinary medicine
