**The Next Step in
Sustainable Blister Packaging!**

kpNext[®] RB2

The Next Step in Sustainable Blister Packaging!

Pentapharm[®] kpNext[®] RB2: the newest addition to our kpNext[®] Family, redefining recyclable pharmaceutical blister films with cutting-edge performance and sustainability. Designed for the RIC 2 recycling stream, it's a more sustainable alternative that doesn't compromise on functionality or efficiency. Say goodbye to non-recyclable blister films. kpNext[®] RB2 integrates seamlessly into your existing manufacturing processes - no costly retooling, no production slowdowns - while delivering advanced thermoforming capabilities, reliable moisture protection and chemical resistance.

Benefits

Designed to be recycled
in the RIC 2 stream

Halogen-free

Excellent thermoforming capabilities

120 g/m² PVdC barrier characteristics
& chemical resistance

Sustainable competitive advantage

Applications

- Over-the-counter (OTC)
- Ethicals
- Generics
- Nutraceuticals
- Veterinary medicine
