## Redefining Sustainability in Medical Packaging

Introducing SecondLife<sup>®</sup> MD medical device films, a sustainable solution that embodies eco-consciousness without compromising quality. These innovative films are produced at our ISCC Plus certified facilities, utilizing up to 50% post-consumer recycled content, marking a significant step towards reducing environmental impact in the medical device packaging industry. With SecondLife<sup>®</sup> MD, you can trust in both the performance and sustainability of your packaging materials

## Sustainability

SecondLife<sup>®</sup> MD films process as if virgin material was used, with the added benefit of contributing to the circular economy by utilizing PCR material. Join kp in making a significant step toward sustainability without sacrificing quality or performance!

## Benefits

Medical grade PETG with up to 50% certified recycled content\*

Molecularly equivalent to Eastar<sup>™</sup> 6763

Regulatory compliant; ISO 11607 & 10993 and ISCC Plus certified

Virgin performance films derived from land-fill diverted plastics

\*Certified content via ISCC Plus certification  
Eastar<sup>™</sup> is a trademark of Eastman
