Pentaform[®] kpEnhance[™]

Enhancing Health and Wellness

Pentaform® kpEnhance™

Pentaform® kpEnhance™ is a high-performance, cost-effective line of blister films developed specifically to meet the needs of the dietary supplement market. Blister packs made from Klöckner Pentaplast films are convenient, easy to use and provide maximum product protection.

Benefits

-  Superior protection of supplement shelf-life, freshness and product integrity
-  High-speed formulations increase packaging line performance while reducing overall packaging costs
-  Standardized structures for lower pricing and reduced lead times
-  Enhanced clarity and chemical resistance

Applications

- Vitamins
- Minerals
- Botanicals
- Probiotics
- Fish Oil
- Gummies

Product Portfolio

Pentaform® kpEnhance™ Mono

- Go-to solution for vitamins, minerals and botanicals
- Cost-effective homopolymer formulations with improved draw and great dimensional stability
- Copolymer formulations ideal for high-speed packaging lines and complex blister geometries
- Enhanced optical clarity and chemical resistance

Pentaform® kpEnhance™ Duplex

- Helps protect product shelf-life and organoleptic properties
- Provides mid-to-high barrier protection from moisture, oxygen and aroma
- Coated with kp's Super Glide (SG) PVdC for improved line performance and lower overall packaging costs
- Available in 40gm² coat weights

Pentaform® kpEnhance™ HBC

- The latest in ultra-high barrier PVdC technology providing unrivaled protection for the most sensitive supplement applications
- High-crystallinity PVdC provides higher barrier at competitive costs
- Increased productivity with smaller card format versus cold-form foil
- Available in 120gm², 180gm² triplex and symmetrical structures
