kpEnhance[®] RM1

Enhancing health and wellness

The nutraceutical supplement market now has a sustainable option for blister films with kpEnhance[®] RM1. Our new film contains a minimum of 30% and up to 80% post-consumer recycle content collected from at-risk coastal communities and is designed to be recycled in the RIC 1, PET recycling stream. kpEnhance[®] RM1 closes the sustainability loop without sacrificing performance!

Benefits

Designed to be recycled in the RIC #1 stream

Plug & play with current equipment

Produced with post-consumer recycled content

Superior optical clarity
